

Retirement Services *Fourth Quarter 2019*

Aggressive Model

INVESTMENT PHILOSOPHY

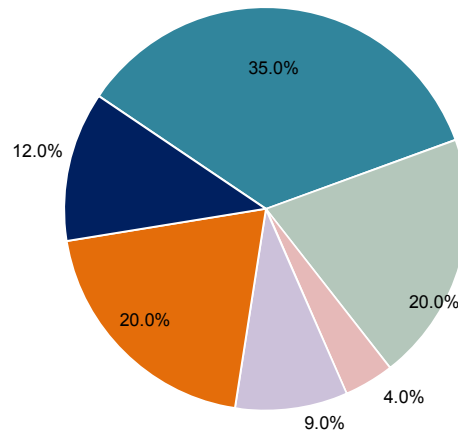

The objective of the Aggressive Model is capital (price) appreciation over the long-term with dividend income as a limited consideration. The interest rate and market value of the model will change in reaction to interest rates, government policies and worldwide economic conditions. The Aggressive Model is exclusively a stock portfolio, utilizing mutual funds that could include both domestic and international securities. The portfolio is diversified between value and growth, large and small, and domestic and international companies.

TOTAL RETURN

| | Quarter | 1 Year | <i>Annualized</i> | |

Average Model Fee (Basis Points)

23

Data as of December 31, 2019. Portfolio allocations are subject to change at any time based on market or other conditions. Performance illustrated for Haverford's Aggressive Model is hypothetical, is net of internal fund fees, assumes reinvestment of dividends and capital gains over time and is rebalanced semi-annually. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

Morningstar Aggressive Target Risk. Indices are unmanaged, do not incur fees or expenses and cannot be invested in directly. Past performance is no guarantee of future results. Content should not be considered a solicitation or recommendation with respect to any product or security. Investing outside the United States entails additional risks such as political and economic risks and the risk of currency fluctuation. For each fund listed, investors should consider carefully information contained in the prospectus, including investment objectives, risks, charges and expenses. You can request a prospectus by calling 610-995-8726. Please read the prospectus carefully before investing. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.
