

INVESTMENT PHILOSOPHY

The objective of the Moderately Conservative Model is income generation with capital appreciation as a secondary consideration. The interest rate and market value of the model will change in reaction to interest rates, government policies and worldwide economic conditions. The Moderately Conservative Model allocates its assets to approximately 70% fixed income and 30% stocks. The asset classes are high-quality fixed income and stock funds. The fixed income portion consists of domestic and international mutual funds. The stock portion is diversified between value and growth, large and small, and domestic and international companies.

Data as of December 29, 2023. Portfolio allocations are subject to change at any time based on market or other conditions. The performance illustrated for Haverford's Balanced Model is hypothetical, is net of internal fund fees, assumes reinvestment of dividends and capital gains over time, and is rebalanced semi-annually. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points that can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance results, and all of which can adversely affect actual trading results.

Morningstar Moderate Target Risk is shown for illustrative purposes only. Indices are unmanaged, do not incur fees or expenses, and cannot be invested in directly. Past performance is no guarantee of future results. Content should not be considered a solicitation or recommendation with respect to any product or security. Investing outside the United States entails additional risks such as political and economic risks and the risk of currency fluctuation. For each fund listed, investors should consider carefully the information contained in the prospectus, including investment objectives, risks, charges, and expenses. You can request a prospectus by calling 610-995-8726. Please read the prospectus carefully before investing. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than the original cost.
